

Windows 2000

Dial-up Networking Instructions

April 2003

These instructions will set up Dial-up Networking in Windows 2000.

Before you begin:

Connect your computer's modem to the phone line in your home. Most modems have two jacks for phone cords. The phone cord from the wall needs to be plugged into the jack marked **line**.

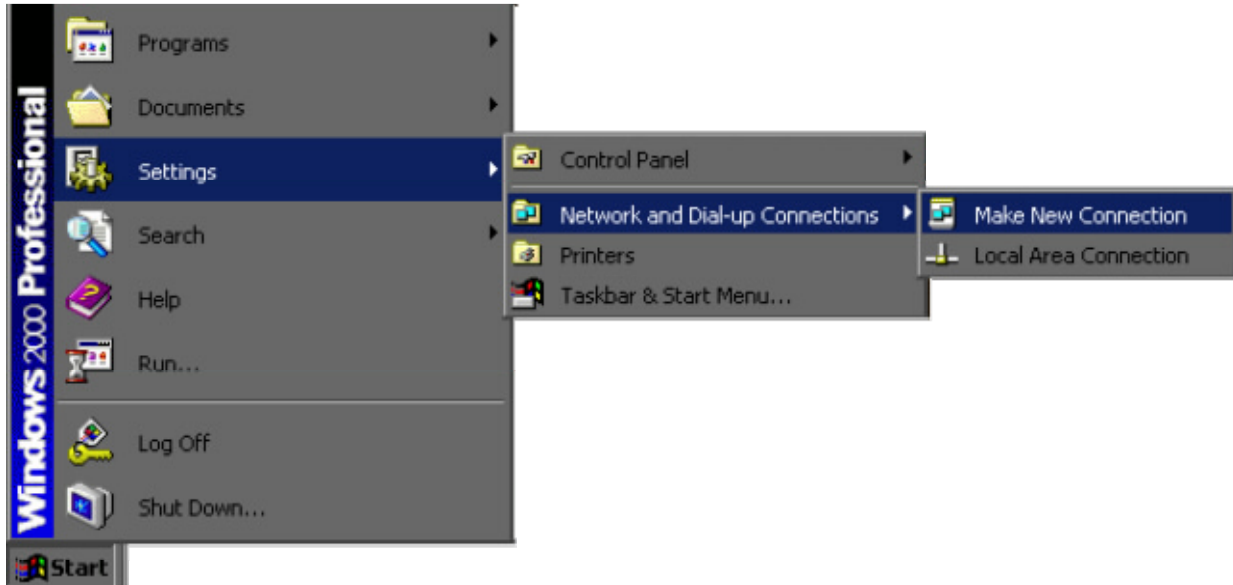

Step 1:

Click the **Start Button**

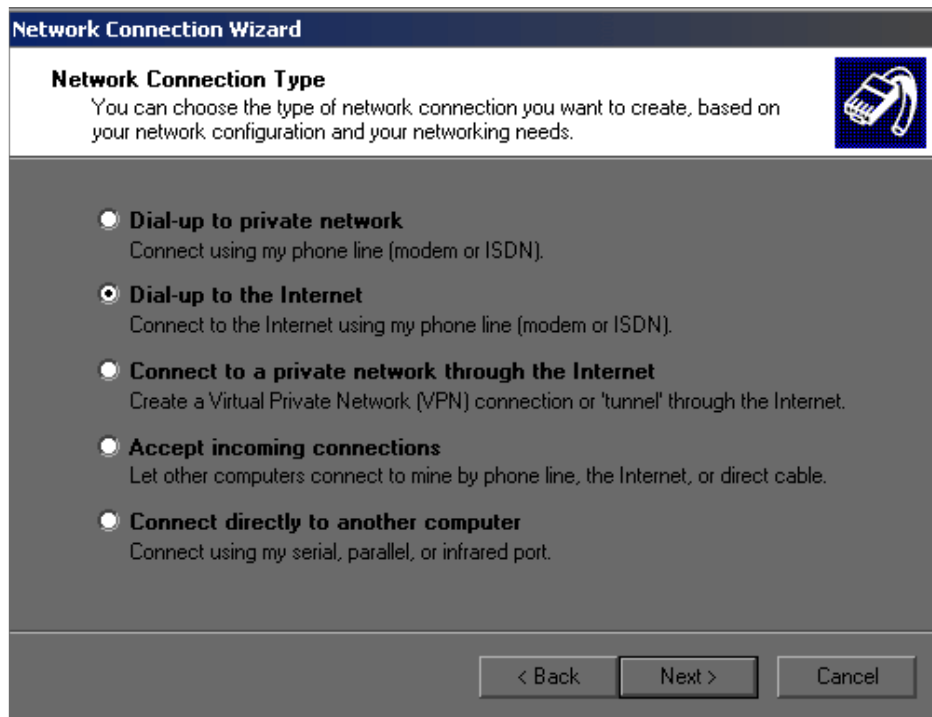

Click **Settings**

Network & Dial-up Connections will be listed, click on it.

Click on **Make New Connection**

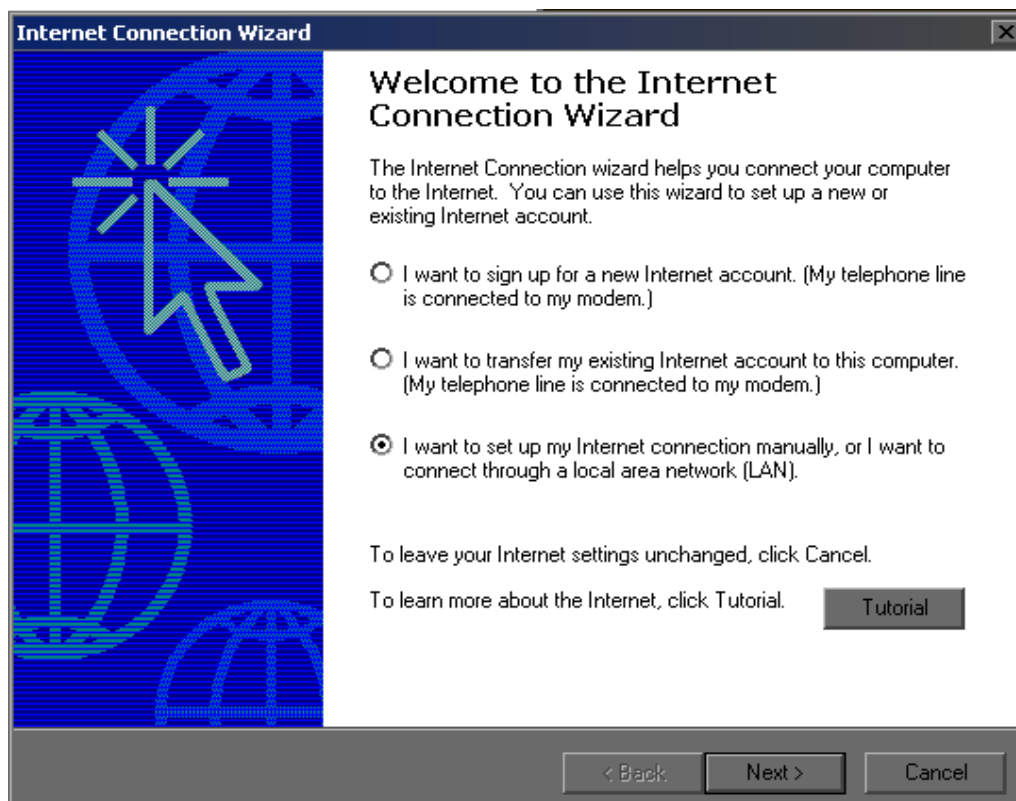

Choose **Dial-up to the Internet**, and click **Next**.

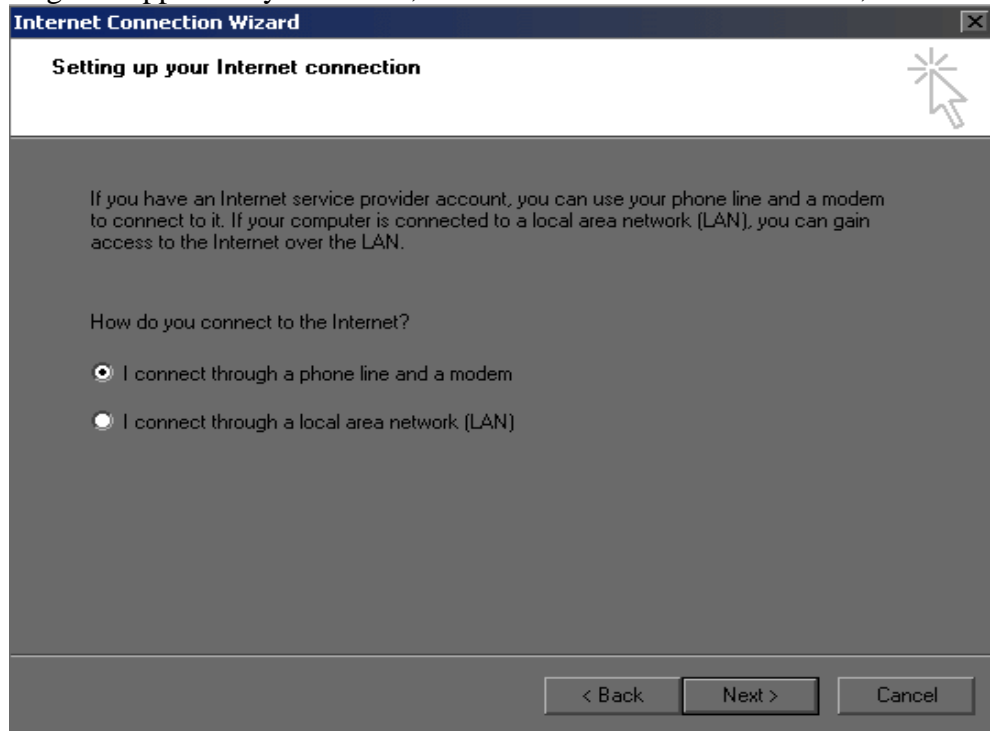

Step 2:

The following will appear on your screen. Choose **Set Up Connection Manually**, and click **Next**.

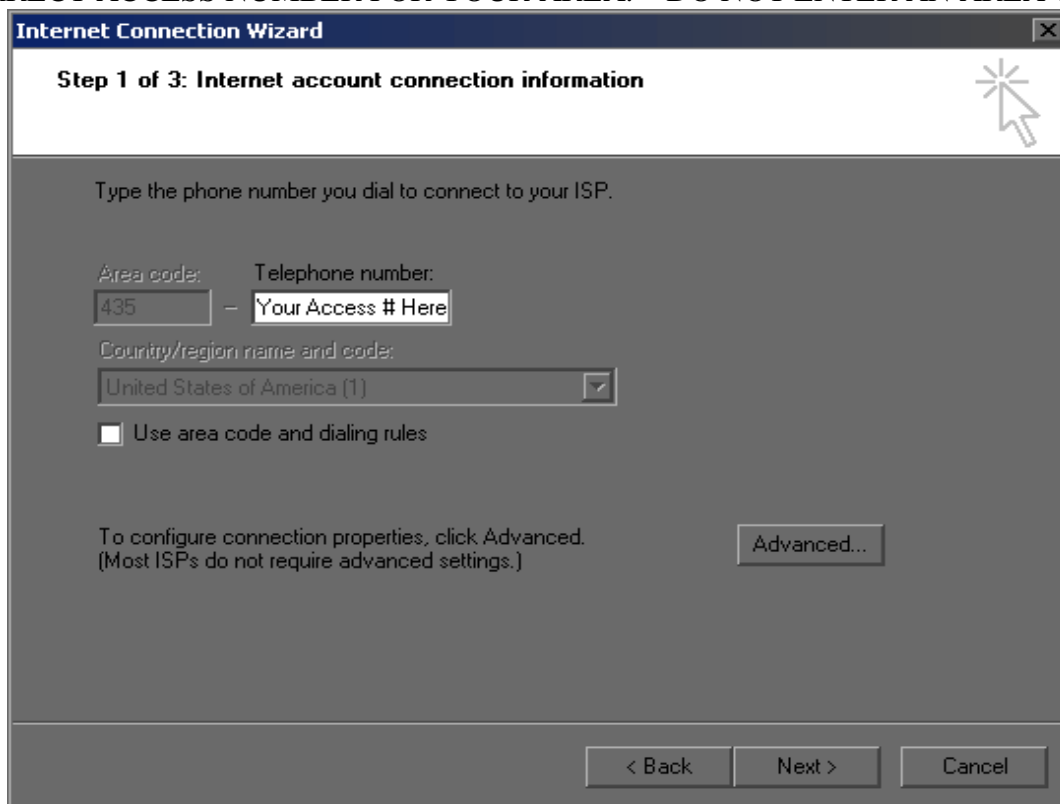

The following will appear on your screen, choose **Phone line and a modem**, and click **Next**.

Step 3

You will be prompted to enter the access phone number for your area. Please find the access number for your area on the table below and enter it. ***Uncheck the Use Area Code checkbox.**

TO AVOID LONG DISTANCE CHARGES, PLEASE IDENTIFY AND ENTER THE CORRECT ACCESS NUMBER FOR YOUR AREA. *DO NOT ENTER AN AREA CODE

Click **Next** to continue.

South Central Access Phone Numbers

Cedar City and local areas (i.e. Parowan, New Harmony, Enoch)	867-2860
St. George and local areas (i.e. Hurricane, Santa Clara, Ivins)	986-5760
Richfield and local areas (i.e. Salina, Monroe, Aurora)	893-2300
Beaver	386-0155
<p>South Central Utah Telephone Customers:</p> <p>If South Central Communications is your local telephone company (i.e. You live in Kanab, Orderville, Bryce Valley, Escalante, Panguitch, Duck Creek, Enterprise, Milford, Piute & Wayne counties, etc), your access number will be the local three-digit prefix of the area you live in plus 0155.</p> <p>For example: Kanab residents will dial 644-0155, Milford residents 387-0155, Bicknell residents 425-0155, Escalante 826-0155.</p>	<p>###-0155</p> <p>### = Your local 3-digit prefix</p>

* You may enter an area code to access South Central Internet via long distance from outside the local Internet coverage area.

Step 4

The following prompt requires that your **username** and **password** be entered. Please enter the username that you chose at sign-up. Usernames are always entered in lower-case letters with no spaces. Passwords will also be entered in lower-case letters unless otherwise specified by you. Note: You may opt to not enter the password here. If so, you will have to enter it each time you connect to the Internet. Click **Next**.

Internet Connection Wizard

Step 2 of 3: Internet account logon information

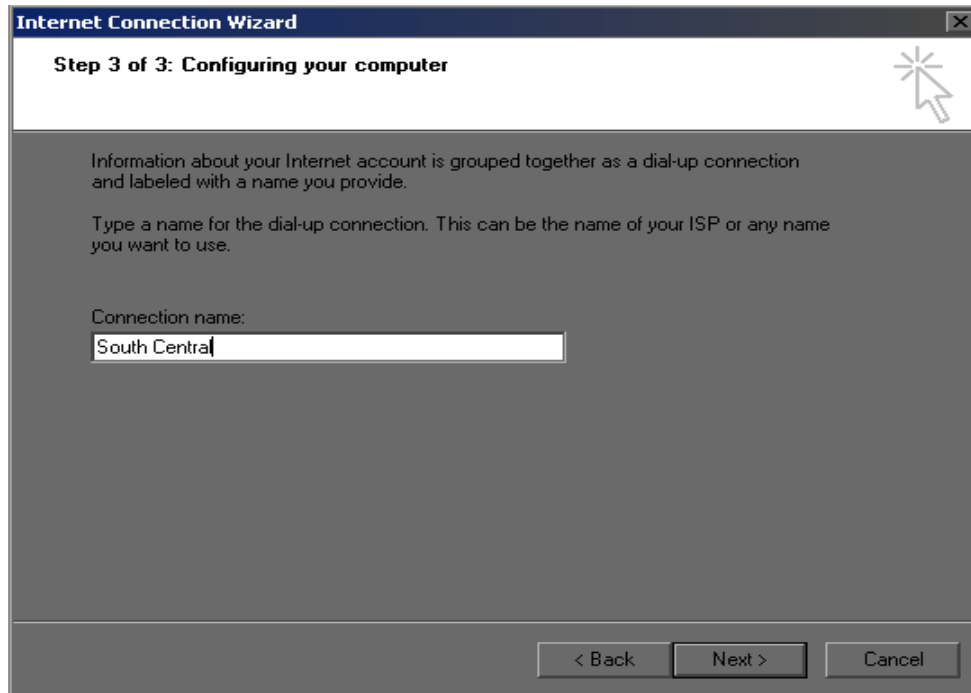

Type the user name and password you use to log on to your ISP. Your user name may also be referred to as your Member ID or User ID. If you do not know this information, contact your ISP.

User name:

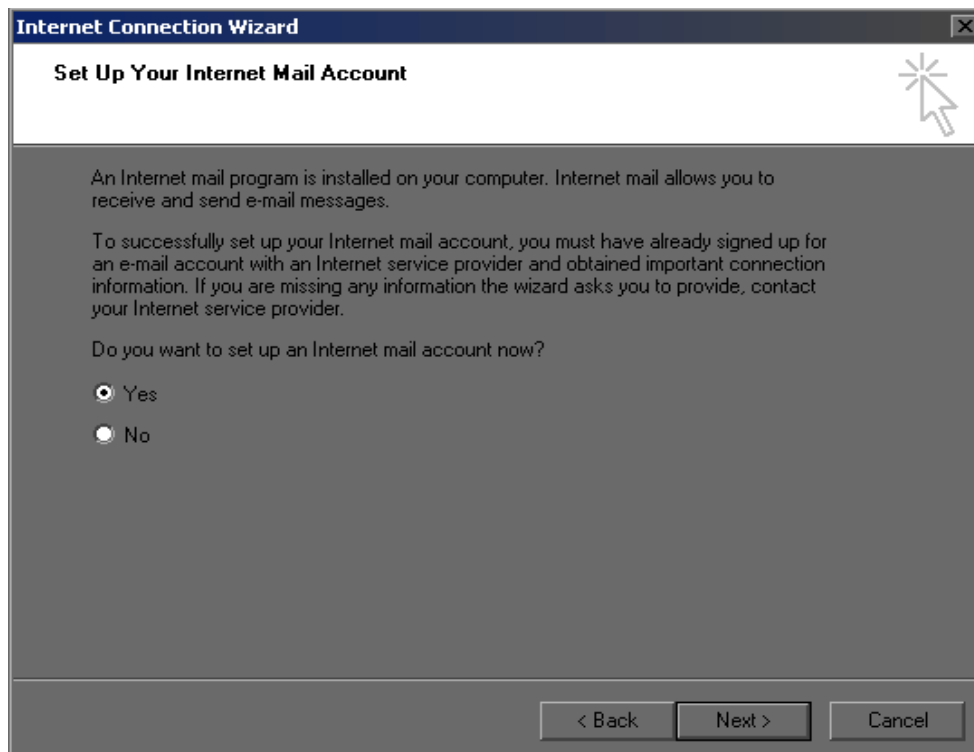

Password:

< Back Next > Cancel

Enter **South Central** as the **Connection Name**. Click **Next** to continue.

If you would like to set up your South Central mail account now, select **yes**, and click next. Refer to South Central Tech Support or to our online email account setup instructions at <http://www.scinternet.net/support>

Otherwise, select **no**, click **Next**, then click **Finish**

Your dial-up networking connection has been created. To place a shortcut on the desktop, **right-click** once on the **South Central** connection and choose **Create Shortcut**.

SCUTA area

(South Central is your local phone provider): 611 ext 244

Fax: (435)-867-5237

Information about Dial-up Speeds and Connectivity

Dial-up speeds are determined by several factors including modem speed and connection quality. Our modems are 56K v.92 modems. Most customers connect at speeds between 40K and 50K. Customers with older modems, in rural areas, or with poor quality phone lines may connect at lower speeds.

If you experience trouble getting connected or staying connected, consider updating your modem drivers to the latest version offered by your computer/modem manufacturer. Please contact South Central Tech Support for more assistance if necessary.

Visit <http://www.scinternet.net/support> for more information about dial-up connections.
